6.1) Additional Comments

- He was an incredible professor. He did his best to make sure that we learned the material.
- None
- The first two exams went well and his instruction was fine, however, in the last third of the semester his instruction made no sense and the third exam questions looked nothing like what we had covered in class. Also, during his instruction, he would go through the material so fast and then move right onto examples, leaving everyone confused. I thought I was doing well in the course, up until these past three weeks, now I'm not sure where my grade stands. One last thing, the homework is more challenging than the exams, and having homework worth 30% of our grade is quite a big portion of our grade.
- The homework does not always reflect what is on the test. Sometimes, the professor also assumes that we know how to do something and does not explain a process well even when we ask questions about it.
- The professor was great! The class itself was fun until limits and sequences and series. I.E., discrete math is way better.
