MATH Survey Evaluation Results for 2021 Spring

Bernard Lidicky,

In the attachment you will find the evaluation results of the survey MATH 143 W5 (S2021) [Bernard Lidicky].

If you have questions or comments contact your Class Climate MATH Administrator or email [course-evaluation@iastate.edu](mailto:course-evaluation@iastate.edu)

Question text

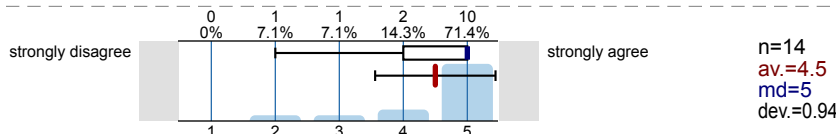

n=No. of responses  
 av.=Mean  
 md=Median  
 dev.=Std. Dev.  
 ab.=Abstention

## 1. Course Formative Feedback for Instructors

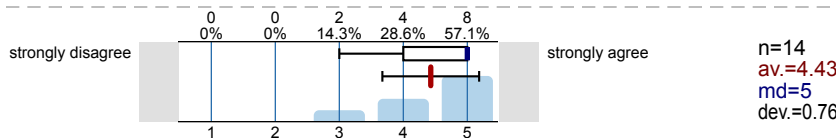

1.1) The instructor(s) provided feedback on my academic work that was helpful to my learning.

1.2) The instructor(s) assisted me when I had questions regarding course content during the semester.

1.3) The instructor(s) established an environment that was conducive to learning.

1.4) What helped your learning the most in this course?

- Breaking down the work that was shown in the homework
- Having videos to go back to to reinforce knowledge on topics.
- KNEWTON ALTA
- The Knewton Alpha homework resource was EXTREMELY helpful and is what most improved my understanding of pre-calculus. I also really appreciated the meeting times for questions that's were available.
- The Knewton Altima learning program that assisted me when I struggled.
- The ability to work at our own pace helped a lot. Since it was a winter term class, it was helpful to know that I could work ahead on things beforehand so I wouldn't have to worry about completing assignments while with family over holidays or on vacation.
- The adaptability and finding peers also taking the course.
- The homeworks
- The videos on knewton helping me solve the problems i had to complete
- We had the opportunity to work at our own pace and were weren't overwhelmed
- the homework assignments were really good practice.

1.5) What challenges did you encounter this semester in your learning?

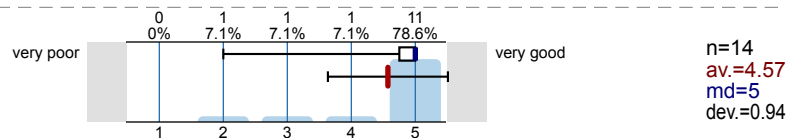

- Certain parts of homework having difficult to break down math mechanics
- Fast pace but preferred it

- Finding enough time to do the homework, quizzes, and exam with my work schedule.
- I feel this semester went very well! There was a slight disconnect between the homework and the quizzes at times but overall that challenge wasn't difficult to overcome.
- I had trouble being focused while at home.
- Keeping focused while at home.
- None
- There was a lot at once sometimes, if you don't take the time to work ahead, the deadlines do start coming up on you quick and suddenly. Unlike fall/spring semester classes, we could have assignments due 3-4 days back-to-back. You need to stay on top of things/work ahead or it can swamp you.
- Time management during this course was a big challenge.
- the homework went off track from what we were learning and was confusing

1.6) What changes could have been made to enhance your learning in this course?

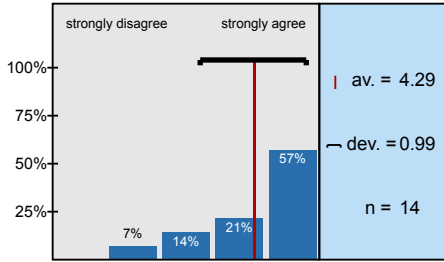

- I think zoom sessions would have been nice to have during the course.
- Learn content prior to homework due
- None
- None
- Nothing that I can think of at the moment.
- Possibly go over questions for exam the next class
- The course had everything we needed to succeed
- There wasn't really anything that I would change about the course.
- This course was actually pretty easy so I didn't have many struggles with content. However, if this had been a harder content class, I might have fallen behind and been worried about the lack of time to get caught up. That's just the nature of an accelerated class though.
- nothing

1.7) My overall rating of this course is:

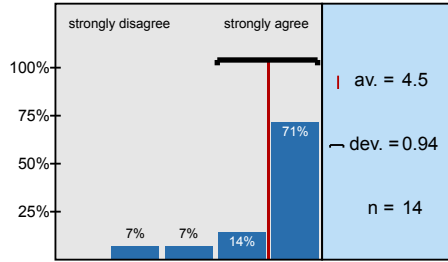

# Histogram for scaled questions

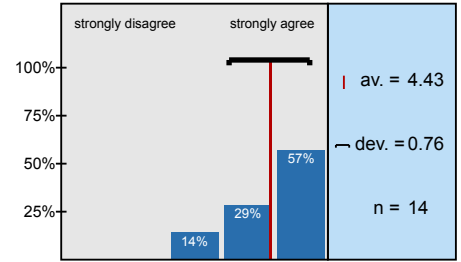

The instructor(s) provided feedback on my academic work that was helpful to my learning.

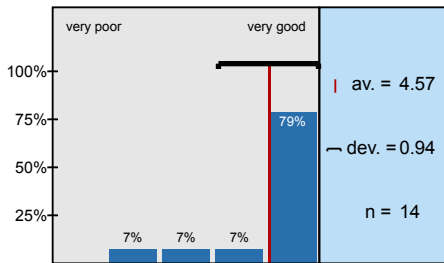

The instructor(s) assisted me when I had questions regarding course content during the semester.

The instructor(s) established an environment that was conducive to learning.

My overall rating of this course is:

# Profile

Subunit: MATH  
 Name of the instructor: Bernard Lidicky  
 Name of the course: MATH 143 W5 (S2021) [Bernard Lidicky]  
 (Name of the survey)

Values used in the profile line: Mean
