5. About You

5.1) On average, how many hours each week did you devote to this course outside the classroom?

5.2) What resources did you use throughout the semester? (Check as many as apply)

5.3) Which ones were beneficial to you? Which ones were not? Please explain below:

■ --

- All of the ones I used
- Going in to ask questions helped me a lot
- I also had a tutor for calculus.
- I prefer to have ease of access when I am looking for assistance and I also like to figure things out on my own as opposed to seeking help from others. As a result, I found the online resources to be the most beneficial.
- Khan academy
- My tutor was not very good. The instructors of this course are some of the smartest people I have ever met and I feel very lucky to have learned from them.
- Office hours
- The SI and recitation instructors were very helpful.
- The most beneficial resource were Butler's lecture videos.
- The office hours were very helpful, but I wish there were more online tools that were specific to this course.
- Tutoring, online and office hours
- not
I don't use extra time to study math

6. Other

6.1) Additional Comments

- --
- Benard LiDicky touched my life in a way that no other recitation leader has. He is a man among men and the perfect teacher I could ask for. I am so glad I had to chance to meet this man and learn calculus from him. There is nothing more this man could have done to make this semester better, he is the perfect recitation leader. Thank you LiDicky.
- Bernard Lidicky might be one of the best people I have ever met
- Bernard is my favorite
- I thoroughly enjoyed this recitation leader. He combined a sense of humor to keep the class interesting with an extensive knowledge over the course material to be able to effectively explain the content and answer any questions presented.
- Make SI more mainstream and advertised, tests were also a little too difficult. Either make tests a tad easier or make quizzes harder so students have some effective practice for the test!
- Tests were too tricky and did not accurately represent what we knew. Just because we couldn't work our way around a trick we had never seen before doesn't mean we do not understand calculus.
