n=No. of responses
 av.=Mean
 md=Median
 dev.=Std. Dev.
 ab.=Abstention

1. Course Formative Feedback for Instructors

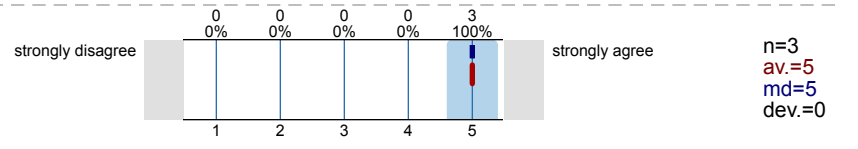

1.1) The instructor(s) provided feedback on my academic work that was helpful to my learning.

1.2) The instructor(s) assisted me when I had questions regarding course content during the semester.

1.3) The instructor(s) established an environment that was conducive to learning.

1.4) What helped your learning the most in this course?

- Being awake and paying attention during lecture. I love Bernard's active way of teaching class, his grad classes are the only classes where I think I learn more from lecture than from the book. He does a great job of building intuition, proof skills, and teaching cutting edge techniques. He also brought in a guest lecturer to learn about other areas of the material which added to the breadth of the class content.
- Bernard is an excellent lecturer. The way he lays out his notes and builds the material works very well for my learning style. I also very much appreciated the opportunities I got to talk to other students in the class, either working through problems early on or the homework we had.
- Meeting face to face.

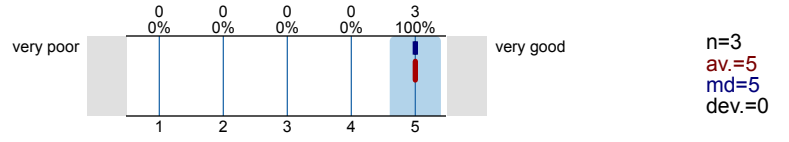

1.5) What challenges did you encounter this semester in your learning?

- Class was early in the morning, my brain had not always powered on. Also I took this class online and it is just easier to get distracted in an online class. All of these are on me and I need to be a better student! It was helpful that Bernard recorded lectures so I could watch them back if one of the above problems happened.
- Meeting virtually.

1.6) What changes could have been made to enhance your learning in this course?

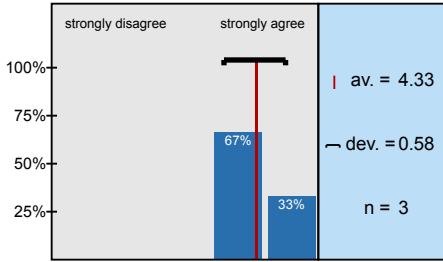

- I think the final project idea is good but I wish that the presentations were more about overviews of other types of color or good examples of certain proof techniques. Possibly if we had more choice over what they were going to be or more clear instruction of what the point of them is that would be better. IDK, class was great!
- It would have been nice to have more time to talk to other students, either in class or outside of class doing homework.
- More time between when homework was assigned and due.

1.7) My overall rating of this course is:

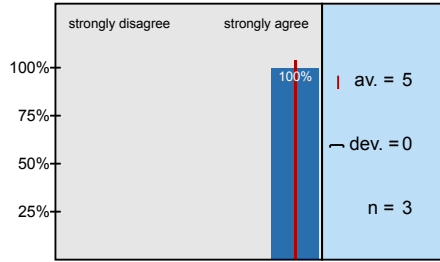

Histogram for scaled questions

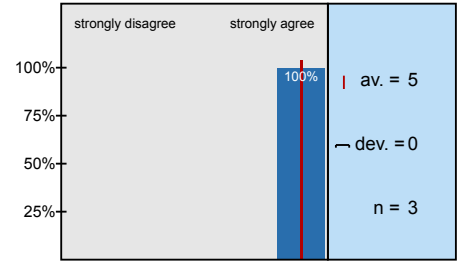

The instructor(s) provided feedback on my academic work that was helpful to my learning.

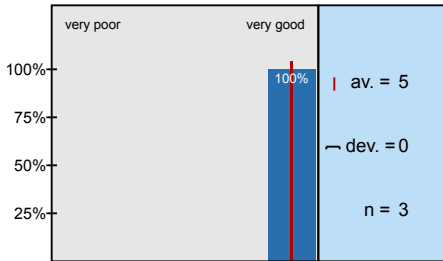

The instructor(s) assisted me when I had questions regarding course content during the semester.

The instructor(s) established an environment that was conducive to learning.

My overall rating of this course is:

Profile

Subunit: MATH
